

**75**  
YEARS

AUSTRALIAN  
CABINET &  
FURNITURE  
ASSOCIATION

A photograph of two men in a workshop. The man on the left is wearing a high-visibility yellow-green shirt and safety glasses, looking intently at a piece of wood on a table saw. The man on the right is wearing an orange safety vest over a dark shirt and safety glasses, looking towards the camera. The background shows a wooden wall and various workshop equipment.

# CABINET & FURNITURE MAKING TRAINING

# ENHANCING SKILLS IN OUR INDUSTRY

**MSF30322 Certificate III in Cabinet Making and Timber Technology**

---

Australian Cabinet and Furniture Association (ACFA) has been delivering industry-specialised training for the cabinet making, furnishing, kitchen and bathroom industries for over 25 years using our workplace-based training model.

ACFA takes pride in its commitment to empower the next generation of our industry through apprenticeship training and provide a pathway for upskilling our workforce. ACFA's workplace-based training model offers a personalised and flexible approach that sets us apart from other providers.

One-on-one, hands-on training provided by our **Industry Specialised Trainers**

# FLEXIBLE ONSITE TRAINING

Our “we come to you” service offering guarantees a personalised training and assessment experience, while our rolling intakes enable apprentices to start their journey sooner, without the need to wait for the next round of enrolment days.

**We’re dedicated to making apprenticeship training efficient, effective, and tailored to your specific needs.**

#### **Nationally Recognised Qualifications**

Workplace based training qualifications obtained through ACFA are nationally recognised.

#### **Industry Specialised Trainers**

ACFA trainers and assessors are qualified industry tradespeople with years of industry experience who maintain currency to ensure delivery of best practice training and assessment.

#### **Enrol Anytime**

ACFA takes enrolments on demand, no need to wait for semester beginning and end dates.

#### **Training Subsidies**

Certain qualifications may attract tuition fee subsidies. Eligibility criteria apply.

#### **Flexible Delivery**

Training is accompanied by an online learning platform removing the need for textbooks. Online learning is supplemented by workplace projects and observations.

#### **Recognition of Prior Learning (RPL)**

ACFA programs allow for previous experience to be formally recognised as part of a national qualification. Our assessor will verify the required skills and knowledge based on the relevant training package.

#### **Custom Fit Delivery**

Training is customised to be delivered at your premises on your machinery.

#### **Custom Built Assessments**

Assessments are conducted at your premises and may include work projects.

# FLEXIBLE ONSITE TRAINING

## WHAT WE DO

- Develop a training plan that best reflects your business
- Get hands-on with the tools and machinery in your workshop
- flexible scheduling of training and assessment visits
- Skills development incorporating current industry trends and trade practices
- One-on-one contact with the apprentice and a direct supervisor
- Real work projects and workplace assessments
- Recognition of current skills, knowledge and work experience via our Recognition of Prior Learning (RPL) program

## WHAT YOU GET

- Apprentices and trainees get one-on-one contact with an ACFA trainer and assessor
- Real time updates on how apprentices are progressing
- Remove the need for your apprentice to travel or be released for block training
- Have input into their ongoing training and development
- Have developed and upskilled a team member as a valuable resource to your business

## KEY LEARNING AREAS

- Safety in the Workplace
- Taking Measurements and making calculations
- Read and Interpret relevant plans and documents.
- Creating and understanding cutting lists
- Understanding hardware
- Using a range of hand and power tools
- Producing manual and CAD Drawings
- Manufacturing Techniques
- Surface Preparation and Finishing
- Understanding Edgebanders and drilling machinery
- Installation and Customisation of Cabinetry Projects
- Understanding CNC Machining in the industry
